RE: PERRING PARKWAY SEWER SYSTEM IMPROVEMENTS
Meter Basin's 17 and 33
Stormwater Management Variance
Back River Watershed
EPS Project I.D. M150261
EPS Tracking Numbers: 05-15-2100, 06-15-2101

Dear Mr. Blondell:

This office has reviewed the information submitted and finds that a stormwater management variance can be granted for this project under Section 33-4-113 (a) (2) of Title 4 of the Baltimore County Code. This section of the regulations allows a stormwater management variance to be granted if there are exceptional circumstances such that strict adherence to the provisions of this article would result in unreasonable hardship or practical difficulty and not fulfill the intent of the regulations.

This project is for the installation of an underground sewer main by cut and cover. The existing cover conditions will be re-established once the sewer main is installed. Although the disturbed area is in excess of 5,000 square feet, there will be no increase in impervious area or runoff as a result of this project.

Please contact Michael P. Doyle at 410-887-3768 should you have any questions.

Very truly yours,

/signed/
